

Table 2. IECAM Data. Data types displayed by year (updated: October 2, 2017)

Note: When you select a year while searching for data on IECAM, the search results for each data type display the most recent year's data up to the selected year. This may not be the same as the year you selected. This table indicates what data year is available when you select a display year for a given data type.

Note: These tables list data that are searchable by year. There are additional data in IECAM in static pages and reports.

Note: Data available by year may not be available at every geographic region for that year. (See separate table on geographic regions.)

Note: Data are typically available in the tables-only section of IECAM before they are available in the GIS map section.
