

**Table 4. IECAM Data. Additional data available beyond the online database** (updated: April 17, 2019)

IECAM presents some data outside of its online database. Most of these data are available in the Child and Family Characteristics section of the IECAM Web site. These data are presented by various regions and for various years. The table below lists some data types (not including those available in the online database) that are available in the Child and Family Characteristics section. Please see the indicated Web page for the specific regions and years presented.

For a full list of Child and Family Characteristics data on the IECAM Web site, visit the page: <https://iecam.illinois.edu/characteristics/other-factors/>
